

SEMPERA ORGANICS

INGREDIENTS FOR LIFE

We are an Ag bio-tech company based in Silicon Valley, California. We specialize in developing and producing organic fungi ingredients to create superfoods and functional beverages.

We produce the highest quality functional mushroom powders and extracts. Our products are 100% certified organic, gluten-free, cGMP and food safety standards compliant and grown in our high-throughput state of the art lab farm.

Wow your consumers, build brand loyalty and expand your product portfolio with Sempera Organics mushroom ingredients.

Fantastic Functional Fungi

Used as medicine for over 2000 years throughout Asia, mushrooms are clinically studied and scientifically proven to help with some of life's persistent problems: **immunity, sleeplessness, anxiety, performance and aging**, to name a few.

By adding our super ingredients to your food and beverages, you can elevate your brand beyond taste and nutrition.

It's truly food as tasty medicine! Our mushrooms are **GRAS listed** so you can be assured that your customers are always safe.

Taste, Smell & Flavor

Functional mushrooms can range from bitter to mild, earthy to full of umami. We make them adaptable to modern cuisine. Through our proprietary grow and processing technology, we can custom create various taste (mild, caramel, roasted) and flavor profiles to suit your products without losing their potency.

Limited Only by Imagination

Mushrooms are highly versatile. Our functional mushrooms fit nicely into a wide array of foods — savory, sweet and spicy. We provide the magical ingredients that transform any food into a superfood.

Our Products

We grow our mushrooms in our lab farm and process/extract them into fine powders of various particle sizes. This gets you consistent quality every time. We also produce proprietary blends and custom blends.

Our Superhero Mushrooms

REISHI

This mushroom is not edible unless dried and powdered. It tastes earthy and bitter. We can vary the bitterness through processing.

LION'S MANE

This mushroom is edible in its natural form. It tastes like crab meat.

TURKEY TAIL

This mushroom is technically edible but it is best powdered and dried. It tastes leathery, mild, and earthy.

CHAGA

This mushroom is not edible unless dried and powdered. It tastes earthy and bitter, with notes of vanilla.

CORDYCEPS MILITARIS

This mushroom is edible in raw, powdered, or extracted form. It tastes nutty and mild.

SHIITAKE

This mushroom is edible in its natural form. It tastes meaty and full of umami.

KING OYSTER

This mushroom is edible in its natural form. It tastes very meaty and full of umami.

MAITAKE

This mushroom is edible in its natural form. It tastes meaty, full of umami and notes of pepper and chocolate.

Our Blends

Powders of individual mushroom species can be blended to maximize wellbeing goals. We have proven formulations that do just that, so you don't have to worry. Our formulations can be adjusted to the flavor profiles that you desire.
